

North Boundary of T41 N. R586

Survey commenced June 28th 1897
with a W. & L. G. Gurley light
mountain transit with solar
attachment and double verniers
reading to single minutes of arc
which is also the least count of
the latitude and declination
arcs.

The instrument was tested &
found in correct adjustment.
as reported in the field notes of
subdivisions

From the corner to Sp. 4442 N
R. 58 & 59 E which is a rock
firmly set & properly marked
& witnessed & agreed by, with
Surveyor General's notes,
I run west on random on the
