

General description

In this township the land classed 1st rate is alluvial bottom, requiring little preparation for cultivation while the classed 2nd rate is higher & will need ditches &c; 3rd & 4th rates are mostly valuable for grazing.

There is an enclosed field in secs 10 & 15 which has been cultivated.

This township is watered by T. Creek & the tributaries. There is no timber and no minerals have been discovered in the township.
