# South boundary of

October 24<sup>th</sup> 1897 at the corner  
to Tps. 42 + 43 N Rrs 60 + 61 E  
I set off  $41^{\circ} 37' N$  on the latitude  
arc and  $11^{\circ} 58' S$  on the decl arc and  
at 8<sup>am</sup> determine a true meridian  
with the solar.

Thence I run East on a random  
line bet Tps 42 + 43 N Rrs 61 + 62 E  
setting temporary corners at 40  
+ 80 Chs and at 11 miles 67 Chs 55<sup>ths</sup>  
intersect West boundary of S. 43 N R.  
63 E. 25 Chs 35<sup>ths</sup> N of corner to Tps  
42 + 43 N R 63 E. which is a rock  
with traces of mound + pits.

I set closing corner as described in  
field notes by Tps. 42 N R 62 E. &  
after diligent search am unable to  
find any trace of old 14 sec on  
which should be 14 Chs 45<sup>ths</sup> N  
of my closing.
