

General Description

This township is watered by Salmon River and the North Fork of Salmon River which make a junction in Sec 16.

Meadow lands are found in Secs 19, 30, 20, 21, 16, 8, 9, 5.

The streams flow for the most part through deep canons.

The uplands are mostly covered with good bunch grass and very dense sage brush.

A very large mountain known as the "Vineyard" lies just east of this township and Salmon River after passing around the south end of the mountain resumes its northerly course along the east foot of this mountain.
