

West Boundary of T. 32 N. R. 47 E

June 27th 1903

I began at the cor. to T. 32 N. R. 46 and 47 E. and retraced the line running North between these two townships.

I set off $40^{\circ} 35'$ on the latitude arc and $23^{\circ} 23'$ on the declination arc and at 8^h pm L. M. T. determine a true meridian with the solar.

Thence I ran North on this boundary line for 2 miles and found that from the township cor. to the cor. sec's 25 and 36 the distance is 79.38 Chains

and the line is not straight but has a bearing, the first half mile of $N. 1^{\circ} 40' E.$ and the second half of $N. 1^{\circ} E.$

From the cor. of sec's 25 and 36 to the cor. of sec's 24 and 25 The distance is 83.26 and the line is straight with a bearing of $N. 1^{\circ} 27' E.$
