

Re-Survey of

Sixth Standard Parallel North

through Range 52 East, Mount D. R. ^{and} M.

on west face, with 6 grooves, on south, east and west faces; dug pits 30x24x12 inches crosswise on each line, east and west 4 feet and south of post 8 feet distant; raised a mound of earth 4 feet base 2 feet high south of corner.

68.50 Draw 25 feet below top of spur, course N.25°E.

Ascend.

80.00 Failed to find any trace of old Standard Township corner and owing to the fact that I have found all other corners on this line and that my measurements and ~~align~~ment agree with the old original notes, I re-establish Standard Township corner for south-west corner of Township 31 North Range 52 East by setting a basalt stone 16x12x10 inches 10 inches in the ground marked S^{orisk}C_A6 grooves on north and 6 grooves on east faces; dug pits 36x36x12 inches on line east 8 feet and north of stone 8 feet distant; raised a mound of earth 5 feet base and 2½ feet high north ^{east} of corner. Land mountainous; soil rocky; third rate; with growth of scattering Juniper timber, sage brush and bunch grass.
