

BOUNDARIES OF T.4 S., R.47 E.

GENERAL DESCRIPTION

This township is mountainous throughout with the exception of the NE. portion, which extends into Cactus Flat.

Cactus Mountain, a rough, rocky and rugged mountain, extends into the township from the NW. to near the S. bdy. of the Tp.

There is no timber on any part of this township.

Cactus Flat is a large valley running in a northwest and south easterly direction, with sandy soil and covered with a dense growth of desert brush.

The only water in the Tp. is Antelope Springs; this spring is pure water and the water sinks before it flows 50 ft. away from the spring.

As the spring is located in a canon it cannot be seen from any point on the boundaries of this Tp., it could not be located by courses.

The approximate location of Antelope Springs is about 1 mile south from the $\frac{1}{4}$ sec. cor. bet. secs. 4 and 33, on the N. bdy. of the Tp.

Wilson's Camp, comprising 5 tents, used by miners working at the Cactus Peak mine, is located in the SE $\frac{1}{4}$ of sec. 36.

The only indications of mineral in this township are found in the southeastern portion.

There are no settlers in this township.

EAST BOUNDARY OF T.3 S., R.47 E.

October 31: At 7h.44m., a.m., l.m.t., I set off $37^{\circ}35'N.$ on lat. arc, $13^{\circ}55'S.$ on decl. arc, and determine a meridian with the solar at the cor. of Tps. 3 and 4 S., Rs. 47 and 48 E.

Thence I run north on a random line, along the E. bdy. of T.3 S., R.47 E., setting temp. $\frac{1}{4}$ sec. and sec. cors. at intervals of 40.00 chs.; and at 458.04 chs., intersect S. bdy. of T.2 S., R.48 E., 3.50 chs. E. of the cor. of Tps. 2 and 3 S., Rs. 47 and 48 E., which is a basalt stone 8x6x5 ins. above ground, marked and witnessed as described by the surveyor
