

GENERAL DESCRIPTION OF T.3 N., R.51 E.

CHAINS

The eastern half of this township falls on the western slope of Reveille Mountains, the soil of which is rocky and broken by many hollows, with a scattering growth of cedar and pinon timber on the higher portions of the mountain.

The balance of the township falls on Hot Springs Flat, the soil of which is sandy with a gradual slope to the northeast and is covered with a dense growth of desert brush.

There is no surface water in this township.

There are indications of mineral found along the east boundary but there was no work being done on any claims during the time of survey.

CORRECTIVE NOTES OF

NORTH BOUNDARY OF T.3 N., R.52 E.

September 14: At 7h.56m., a.m., l.m.t., I set off $38^{\circ}07'N.$ on lat. arc, $3^{\circ}32'N.$, on decl. arc, and determine a meridian with the solar at the re-established cor. of secs. 2-3-34 and 35, heretofore described.

Thence I run

West, bet. secs. 3 and 34.

Ascend abruptly over rocky and mountainous land,

8.00 Ridge, bears N. and S.

Descend.

16.22 Begin abrupt descent, bears N. and S.

22.00 Hollow, 150 ft. deep, course N.

Abrupt ascent.

28.00 Spur, projects N.

Abrupt descent.

40.00 Set a basalt stone, 15x9x8 ins., 10 ins. in the ground, for $\frac{1}{4}$ sec. cor., marked $\frac{1}{4}$ on N. face, and raise a mound of stone, 2 ft. base, $1\frac{1}{2}$ ft. high, N. of cor.
