

## CHAINS

North, bet. secs. 13 and 18.

40.00 Reset the original stone at the original point described in the original field notes, which is a basalt stone, 14x9x6 ins., 10 ins. in the ground, for  $\frac{1}{4}$  sec. cor., marked  $\frac{1}{4}$  on W. face, and raise a mound of stone, 2 ft. base,  $1\frac{1}{2}$  ft. high, W. of cor.

Pits impracticable.

Note:

This cor. falls in a dry lake, and the original field notes described pits and mound of earth, which have proved not to be permanent.

80.00 The stone described in the original field notes, well marked and well set, I raise a mound of stone, 2 ft. base,  $1\frac{1}{2}$  ft. high, W. of cor.

Pits impracticable.

Note:

This cor. falls in a dry lake, and the original field notes describe pits and mound of earth, which have proved to be not permanent.

There is no change of topography on this line.

North, bet. secs. 7 and 12.

40.00 The cor. described in the original field notes, well marked and well set, I dig pits, 18x18x12 ins., N. and S. of stone, 3 ft. dist., and raise a mound of earth,  $3\frac{1}{2}$  ft. base,  $1\frac{1}{2}$  ft. high, W. of cor.

80.00 I remark the stone described in the original field notes with 5 notches on S. and 1 notch on N. edges, dig pits, 18x18x12 ins., in each sec.,  $5\frac{1}{2}$  ft. dist., and raise a mound of earth, 4 ft. base, 2 ft. high, W. of cor.

There is no change of topography on this line.

North, bet. secs. 1 and 6.

40.00 The cor. described in the original field notes, well set and well marked, dig pits, 18x18x12 ins., N. and S. of stone, 3 ft. dist., and raise a mound of earth,  $3\frac{1}{2}$  ft. base,  $1\frac{1}{2}$  ft.
