balance, rolling.

Soil, rocky, 3rd. rate.

No timber; undergrowth, greasewood.

Mountainous land or dense undergrowth on 80.00 chs.

October 29, 1906.

## GENERAL DESCRIPTION.

The Second Standard Parallel South, through R. 43 E., runs through a large valley which drains into Sarcobatus Flat and on the eastern 2 miles crosses the northern extremity of the Grapevine Mountains.

Through Rs. 44, 45 and 46 it crosses Sarcobatus Flat, a large rolling valley lying in a north west and south easterly direction and in R. 47 E., it crosses the breaks of the south slope of Pahute Mesa.

There is no surface water along this line.

There are no indications of mineral found along this line.
