GENERAL DESCRIPTION.

The southern portion of this township falls on the Quartz Mountain, which is rocky and broken by many hollows and rises about 1000 ft. higher than the balance of the township which falls on the Pahute Mesa, which is rolling and the soil sandy or rocky and covered with a dense growth of desert brush.

There is no timber in this township.

The only water in the township is Monte Cristo Spring, which is located about the centre of the township; it could not be located from any point on the boundaries. There are some indications of mineral found in this township.

EAST BOUNDARY OF T.6 S., R.46 E.

1906

December 30: At 8h.02m., a.m., l.m.t., I set off 37°20' N., on lat. arc, 23°08'S., on decl. arc, and determine a meridian with the solar, at the cor. of Tps. 6 and 7 S., Rs. 46 and 47 E., heretofore described.

Thence I run

North, bet. secs. 31 and 36.
