GENERAL DESCRIPTION

This township is mountainous and broken throughout and most all of the soil is generally rocky and broken by many deep ravines and hollows.

There is a scattering growth of dwarf cedars found on the north slopes of this township.

There is no surface water found in this township.

There are some indications of mineral found in the northern portion of this township, but not in paying quantities.

NORTH BOUNDARY OF T.7 S., R.47 E.

1907

January 5: At 8h.05m., a.m., l.m.t., I set off 37° 20' N., on lat. arc, 22° 37' S., on decl. arc, and determine a meridian with the solar, at the cor. of Tps. 6 and 7 S., Rs. 47 and 48 E., which is a basalt stone, 10x8x5 ins. above ground, marked and witnessed as described by the surveyor general.

Thence I run

West, on a random line, along the N. bdy. of T.7 S., R.47 E., setting temp. $\frac{1}{4}$ sec. and sec. cors. at intervals of 40.00 chs., and at 477.70 chs., fall 2.94 chs. N. of the cor. of Tps. 6 and 7 S., Rs. 46 and 47 E., heretofore described
