GENERAL DESCRIPTION

The southern, eastern and northwestern portions of this township fall on rocky, broken and mountainous land, while the balance is a sandy flat, draining in a northeasterly direction and is generally covered with a dense growth of desert brush.

A scattering growth of dwarfed cedar timber is found in the southern portion of the township.

There is no surface water in this township.

There are indications of mineral found in the southern portion of the township but not in paying quantities.

NORTH BOUNDARY OF T.6 S., R.47 E.

1907

January 7: At 8h.06m., a.m., l.m.t., I set off 37°26'N., on lat. arc, 22°24'S., on decl. arc, and determine a meridian with the solar, at the cor. of Tps. 5 and 6 S., Rs. 47 and 48 E., which is a basalt stone, 9x8x6 ins. above ground, marked and witnessed as described by the surveyor general.

Thence I run

West on a random line, along the N. bdy. of T.6 S., R.47 E., setting temp.  $\frac{1}{4}$  sec. and sec. cors. at intervals of 40.00 chs., and at 476.56 chs., fall 5.85 chs. N. of the cor. of
