

GENERAL DESCRIPTION OF T.11 S.,R.45 E.

The southern portion of this township falls on the Bullfrog Hills, which rise about 1000 ft. higher in elevation than the northern portion which falls in the Sarcobatus Flat.

The soil on the mountainous portion is generally rocky while the balance is sandy while the entire township is generally covered with a dense growth of desert brush. There is no surface water or timber in this township. Currie Well, a supply station, consisting of a few tents is located in about the center of this township, this place could not be seen from any point along the boundaries and therefore could not be definitely located. There are some indications of mineral found in the southern portion of this township.

WEST BOUNDARY OF T.10 S.,R.45 E.

November 14: At 7h.44m., a.m., l.m.t., I set off 36°58'N. on lat. arc, 18°03'S. on decl. arc, and determine a meridian with the solar, at the cor. of Tps. 10 and 11 S., Rs. 44 and 45 E., heretofore described.

Thence I run

North, bet. secs. 31 and 36.

In Sarcobatus Flat, descend gradually over gravelly land, through dense undergrowth.

40.00 Set a basalt stone, 24x6x4 ins., 18 ins. in the ground, for 1/4 sec. cor., marked 1/4 on W. face, and raise a mound of stone, 2 ft. base, 1 1/2 ft. high, W. of cor.

Pits impracticable.

80.00 Set a basalt stone, 15x8x5 ins., 10 ins. in the ground, for cor. of secs. 25-30-31 and 36, marked with 1 notch on S. and 5 notches on N. edges, and raise a mound of stone, 2 ft. base, 1 1/2 ft. high, W. of cor.

Pits impracticable.

Land, nearly level.

Soil, gravelly, 3rd. rate.

No timber; undergrowth, greasewood.
