

BOUNDARIES OF T.13 S., R.48 E.

GENERAL DESCRIPTION.

The south western portion of this township lies in Amargosa Desert, the eastern portion in Crater Flat and the north western portion extends to the top of Bare Mountain.

Bare Mountain is a high, rugged and rocky mountain rising about 3500 ft. above the country south, its sides are steep and there is no vegetation growing on it. The balance of the township is rocky and desert land, and covered with a dense growth of desert brush. There is no surface water or timber in this township. There are some indications of mineral found in this township.
