GENERAL DESCRIPTION.

This township lies in the Amargosa Desert, with the exception of the north-eastern portion which extends on top of the Bare Mountain, which rise about 3500 ft. above the balance of the township.

This mountain is extremely rugged and rocky, with no vegetation growing on it.

The balance of the township is nearly level, the soil is sandy and gravelly and covered with a dense growth of desert brush.

There is no surface water or timber in this township.

There are some indications of mineral found in this township.
