

Subdivisions of T. 21 N., R. 23 E.

Chains

From the cor. of secs. 1, 6, 7 and 12, on E. Bdy. of this Tp., heretofore described, thence I run West bet. secs. 1 and 12.
(Angle right $90^{\circ}12'$ deflected from my line south.)
Ascend gradual valley bench.
40.00 Set a trachyte stone $18 \times 12 \times 8$ ins. 12 ins. in the ground for $\frac{1}{4}$ sec. cor. marked $\frac{1}{4}$ on N. face, and raise a mound of stone $1\frac{1}{2}$ ft. high 2 ft. base, N. of cor.
Pits impracticable.
44.15 Wash, 3 ft. deep, 15 lks. wide, course SE.
45.59 Road, bears NW. and SE.
54.40 Ravine and wash, 10 ft. deep, course SW.
71.12 Road, bears NE. and SW.
72.50 Intersect W. Bdy. of the Pyramid Lake Indian Reservation at a point from which the $132\frac{1}{2}$ M stone on said Bdy. bears $N.20^{\circ}45'W. 4.36$ chs. dist.
Set a lava stone $16 \times 12 \times 10$ ins. 10 ins. in the ground for closing cor. of fracl. secs. 1 and 12, marked CC PLIR on E. face, S 1 on N and S 12 on S face, and raise a mound of stone $1\frac{1}{2}$ ft. high 2 ft. base E. of cor.
Pits impracticable.
Land gradual bench.
Soil, stony and gravelly 2nd and 3rd rate.
No timber.

The magnetic bearing of my line east is $N.72^{\circ}30'E.$ from which the deduced mag. decl. is $17^{\circ}30'E.$

At this cor. Nov. 11, 1910, I set off $17^{\circ}19'S.$ on decl. arc and at 11 h 57 m l.m.t., observe the sun on the meridian, the resulting lat. is $39^{\circ}42'$ which is the proper lat. substantially.

In order to prove the correctness of the survey of the N., E. and S. boundaries of Sec. 1, as returned by me under this contract, and acting under the authority given me by letter of the U. S. Surveyor General for Nevada, dated Aug. 11, 1911, mentioned on Page 2 of this book of Field Notes, I accordingly make use of and return the course and length of the East Bdy. of Sec. 2, this Tp. as retraced by Guy P. Harrington, U. S. Surveyor, and contained in his Report dated June 30, 1911, to the Department, which is as follows:

From N.E. cor. Sec. 2, as set by Deputy Kearney, thence $S.0^{\circ}01'E.$
Along E. Bdy. of Sec. 2.

6.40 Closing cor. of secs. 35 and 1, heretofore described.
60.70 Intersect W. Bdy. of the Pyramid Lake Indian Reservation from which the $132\frac{1}{2}$ M. cor. on said Bdy. bears $S.20^{\circ}45'E.$ 23.35 chs. dist.

U.S. Surveyor Guy P. Harrington says as the closing cor. was not set on the boundary line he moved it to this point from a point bearing South 103 lks. from this point.

GENERAL DESCRIPTION.

This township as surveyed by me lies wholly within the Pyramid Lake Indian Reservation and lies mostly on valley bench reaching to the foot of mountains on the west side along the boundary of said Reservation in Secs. 1 and 12. The soil is mostly gravelly, 2nd rate.

There is no timber and no indications of mineral.
