The cor. to secs. 5, 6, 7, and 8.

Land, mountainous.

Soil, stony, second rate.

Timber, scattering pine, cedar, mahogany, and sagebrush

Mountainous land, very difficult to survey, 83.26 chs.

May 5, 1909.

 GENERAL DESCRIPTION

This township is very rough and mountainous in character, particularly in the western part. It slopes generally toward the south and east. It is drained by Birch Creek and its tributaries. It has a settlement in the south central part. In the main it is good grazing land. The land appears to be mineralized but there are no producing mines.

William Kearney
U.S. Deputy Surveyor.
