GENERAL DESCRIPTION.

The portion of this township surveyed by me is rugged and mountainous in character. It is all fairly good grazing land, and has one small farm in secs. 28 and 33 The mountains are highly mineralized and valuable mines have been discovered and worked in the western part of this township. The town of Austin is nearly all situated in sec. 19, and the richest mines of the mining district in which Austin is situated are located within a few miles of this town.
