Chains

July 15th. 1909.

At 7 h. A.M. l.m.t. I set off 210 35' N. on the decl. are and 400 14' N. on the lat. are and determine a meridian with the solar at the cor. of Tps. 27 and 28 N. R's 51 and 52 E., which is a cedar post almost decayed, thing loose in a mound of earth. I destroy all traces of the old cor. and in the same place I set a pine post, 3 ft. long 4 ins. square, with marked stone 24 ins. in the ground for the cor. of Tps. 27 and 28 N. R's. 51 and 52 E., marked T 28N S 31 on NE., R 52 E S 6 on SE., T 27 N Sl on SW., and R 51 E S 36 on NW. face, with 6 notches on each edge; dig pits 24x24x12 ins. on each line N,E, and W. 4 ft. andt. and S. of post 8 ft. dist., and raise a mound of earth 5 ft. base $2\frac{1}{2}$ ft. high S. of cor.

I retrace the entire W. bdy. of T. 28 N. R. 53 E. without finding any corners until I reach the cor. of Tps. 28 and 29 N. R's. 51 and 52 E., which is a cedar stake nearly decayed, lying in the remains of an old earth mound; and bears N. Oo 34' W. 475.28 chs. from the S.E. Tp. cor. I make a second search along this line without finding any trace of the old corners.

I now retrace the N. bdy of T. 27 N. R. 51 E., being the S. bdy of T. 28 N. R. 51 E., with the following result;

The E_2^1 of the line bet. secs 36 and 1, bears N 890 56' W. and is 40.19 chs. in length.

The W_2^1 of the line bet. secs. 36 and 1, bears N 890 56' W. and is 40.39 chs in length.

I was unable to find any of the remaining corners on this line, until I reach the cor. of T. 27 and 28 N. R's 50 and 51 E., which bears N. 890 56' W.397.90 chs. from the cor. of secs. 35, 36,1 and 2.

I now return to the cor. of Tps. 27 and 28 N. R's. 51 and 52 E. and run,

N. Oo 34' W. bet. secs 31 and 36.

Nose of ridge, bears E. and W.
