Pits impracticable.

Land, mountainous.

Soil, stony, second rate.

Timber, sagebrush.

Mountainous land, 75.35 chains.

August 3rd. 1909.

GENERAL DESCRIPTION.

This township is , for the most part bench land cut up by numerous canons all of which have a course to the SE. There are but two of these canons that have water flowing in them for a portion of the year. One of these canons is under cultivation, and belongs to T.L.Hall who is living on the land. The largest portion of the ranch is situated on sec, 17. The Eastern portion of the township is very dry and extends to the edge of Pine valley.

The valley portion of this township, is very fertile land, and could be made valuable, if water could be obtained for irrigation. It is all good range land.

W. Kearney
U.S. Deputy Surveyor.

As we were always considerable dist. from the office of a Notary Public, and as it was difficult to get the men assembled at any time to take oath, I administered the oath to the assistants myself, in the capacity of U.S. Deputy Surveyor.

W. Kearney
U.S. Deputy Surveyor.
