

Chains

at 40.00 chs. I search diligently but find no $\frac{1}{4}$ sec. cor.

At 80.00 chs. I find the cor. of secs. 1, 2, 35 and 36, falling 35 lks. S. of my line. It is a basalt stone $14 \times 10 \times 9$ ins. marked with 5 and 1 notches on opposite edges and lying in a mound of stone.

I continue my blank line E. bet. secs. 1 and 36.

At 40.00 chs. I search diligently but find no $\frac{1}{4}$ sec. cor.

at 80.15 chs. I find the cor. of Tps. 23 and 24 N, Rs. 25 and 26 E

falling 42 lks. S. of my line.

It is a basalt stone 8×7 ins. by 12 ins. above ground, set in the ground; marked with 6 notches on the N, S, E, and W. edges and witnessed by a mound of stone, 2 ft. base, $1\frac{1}{2}$ ft. high S. of cor.

Since some of the corners are gone on this bdy.; and the others in poor condition it will be necessary to re-survey it, therefore I return to the cor. of Tps. 24 N, Rs. 24 and 25 E; re-established by me Sept. 9, 1911, and resurvey as follows:

S 89° 57' E, bet. secs. 6 and 31

Over rolling basalt mountains.

33.25 ✓ The old $\frac{1}{4}$ sec. cor.

I destroy all traces of this corner and its accessories and re-establish it at the same point as follows:

Set an iron post 3 ft. long, 1 in diam. 24 ins. in the ground for $\frac{1}{4}$ sec. cor. with brass cap mkd.

531 $\frac{1}{4}$
