Land level and mountainous.

Soil, sandy loam, and rocky, 1st and 3rd rate.

Sage and bunchgrass.

November 15, 1910.

GENERAL DESCRIPTION.

This township is practically all high rugged mountains. The soil is generally rocky, covered with short bunch grass, and of value for grazing purposes only. There are a few small springs and creeks in various portions of the township.

A species of scrub mahogany timber covers a good portion of the north slope of the large mountain in the western part.
