Resurvey of the W. bdy.; west of secs. 6, 7 and 18; and the lines bet. secs. 18-19, 17-20, 16-21, 16-17, 20-21, 21-28, 27-28, 27-34, 34-35; and the E. ½ bet. secs. 20-29, and the N. ½ bet. secs. 19-20, T 32 N, R 41 E.

Chains.

Survey commenced Nov. 30, 1910 and executed with a W. and L. E. Gurley light mountain transit, the horizontal limb having two double verniers, placed opposite to each other and reading to single minutes of arc.
The instrument was examined, tested on the true meridian at Reno, Nev. and found correct, Sept. 26, 1910.
At 8 h., a.m., local mean time I set off 49° 20' on the latitude arc and 21° 30' S. on the decl. arc; and determine the true meridian at the cor. of Tps. 32 and 33 N.; Rs. 40 and 41 E., re-established by me Nov. 21, 1910.
Preliminary to completing the subdivision and the S. and W. bdys. of this tp. I run S. on a blank line bet. secs. 1 and 6. At 40 chs. I search diligently but find no ¼ sec. cor. At 80.22 chs. I find the cor. of secs. 1, 6, 7 and 12 falling 46 links W. of my line. It is a basalt stone 14 x 9 x 5 ins. marked with one and five notches on opposite edges and lying on the ground in a mound of stone.
I continue my blank line S. At 40 chs. I search diligently but find no ¼ sec. cor. At 79.80 chs. I find the cor. of secs. 7, 12, 13 and 18 falling 81 links W. of my line. It is a granite stone, 16 x 11 x 7 ins. marked with 2 and 4 notches on opposite edges and lying on the ground in an old mound of stone.
I continue my blank line south. At 40 chs. I search diligently but find no ¼ sec. cor. At 80.30 chs. I find the cor. of secs. 13, 18, 19 and 24 falling 95 links W. of my line.
