General Description.

This tp. may be classed as desert land, and ranges in character from rocky mountains to rolling land. It is traversed from N. E. to S. W. by a high range of mountains, the southern, and southeastern part is rolling land, covered with big sagebush, but useless for farming purposes without irrigation. There is no water available for irrigation and I do not think dry farming would be successful. The northern, northwestern and central portion is mountainous. The mountains
