

Eighth Standard Parallel North, through Range 38 E.

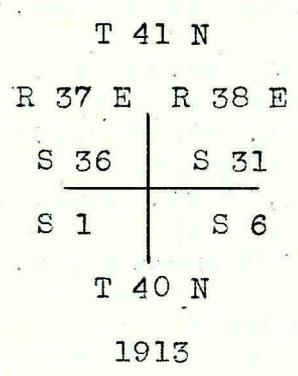

Chains

207.48

Intersect a point 37 lks. S. of the Standard cor. of Tps. 41 N., Rs. 37 and 38 E., which is an iron post, 3 ins. in diam, 12 ins. above ground and marked and witnessed for a closing cor. for Tps. 40 N., Rs. 37 and 38 E. (Note-- This cor. was re-established by Strover and Collins on their resurvey of the range line bet. Tps. 40 N., Rs. 37 and 38 E. at the original point where they found a willow stake and trace of mound and pits. I will further state that this closing cor. was adopted by U. S. Surveyor O. A. Palmer in 1868, Cont. 17 as the Standard Twp. cor. for Tps. 41 N., Rs. 37 and 38 E., from which he surveyed the line north, bet. ranges 37 and 38 E. See notes of retracement of the west bdy. of T. 41 N., R. 38 E. on page 11 of this book.)

I re-establish the above described cor. as follows:

Set an iron post, 3 ft. long, 3 ins. in diam., 24 ins. in the ground for ^{St.} cor. of Tps. 40 and 41 N., Rs. 37 and 38 E., with a brass cap, marked

Dig pits 24 X 24 X 12 ins. N. E. and W. of post 4 ft. dist. and S. 8 ft. and raise a mound of earth, 5 ft. base, 2½ ft. high S. of cor.

The falling of 37 lks. S. obtained on the random west 2½ miles of the Eighth Standard Parallel North, south bdy. of T. 41 N., R. 38 E., gives a return course of S. 89° 54' E. and a correction of the temp. cors. of 7 lks. N. for each half mile, counting from the Standard ¼ cor. on the S. side of sec. 33, therefore I be-
