	Sept. 6, 1911.

GENERAL DESCRIPTION.

The southern two miles of this line passes over a gently rolling valley with drainage toward the west and is crossed by the abandoned grade of the Central Pacific R.R. The northern four miles passes over heavily rolling hills. The soil is a heavy sand mixed with gravel. There is no grass along this line. The only vegetation consists of a low, thorny desert brush known, locally as greaseweed.

There is no water in the vicinity of the line.

W.O.Secor,
U.S.Transitman
