General Description.

This fractional township is rough and mountainous in the northeastern and southwestern parts, and rolling in the eastern and central parts. The soil of the rolling land, is a mixture of clay, sand, and gravel, usually strewn with rock. The mountainous land is composed of volcanic and granite rock, with many quartz outcroppings, showing good indications of mineral. There is no timber in the township, except once in a while, a stunted Juniper. The only other vegetation is stunted desert brush. There is no water in the township, nor are there any settlers.
