

Resurvey of the east bdy. of T. 38 N., R. 34 E.

Chains May 13, 1914.

The cor. of Tps. 38 and 39 N., Rs. 34 and 35 E. is a mound of earth and trace of pits and a stake set in the south pit, marked as described by the surveyor general. As this cor. is now poorly defined on the ground I destroy all trace of it and at the same point Set an iron post, 3 ft. long, 3 ins. in diam., 24 ins. in the ground for a new township cor., with a brass cap, marked

and dig pits 24 X 24 X 12 ins. on the lines N., E. and W., 4 ft. dist., and S. 8 ft. and raise a mound of earth, 5 ft. base, $2\frac{1}{2}$ ft. high, S. of cor.

I set up the instrument over this cor., and at 8h., Om., a. m., 1. m. t., set off $18^{\circ} 18'$ N. on the decl. arc, and $41^{\circ} 12'$ N. on the lat. arc, and determine a meridian with the solar.

Thence I retrace

South on a random line bet. secs. 1 and 6.

40.79 Intersect a point 40 lks. W. of the old $\frac{1}{4}$ sec. cor., which is a mound of earth and trace of pits and a redwood stake, 2 X 2 ins. by 20 ins. long lying in S. pit, and marked as described by the surveyor general. I destroy all trace of the old cor. and at same point Set an iron post, 3 ft. long, 1 in. in diam., 24 ins. in the ground for a new $\frac{1}{4}$ sec. cor., with a brass cap, marked for sec. 6 only

$\frac{1}{4}$ S 6

1914

and dig pits, 18 X 18 X 12 ins., N. and S. of post, 3 ft. dist. and raise a mound of earth, $3\frac{1}{2}$ ft. base, $1\frac{1}{2}$ ft. high, E. of cor. True course is S. $0^{\circ} 34'$ E.
