

Chains

From the cor. of secs. 19, 24, 25 and 30, which is a volcanic stone, 16x12x6 ins. firmly set in a mound of stone mkd. as described by the surveyor general. As this cor. lies within the State of Nevada I destroy all traces of this cor. Thence retrace North, on E. Bdy. of sec. 24.

40.50 Fall 20 lks. E. of the old $\frac{1}{4}$ sec. cor., which is a volcanic stone, 14x13x6 ins. firmly set in a mound of stone, mkd. and witnessed as described by the surveyor general. The true bearing of this $\frac{1}{2}$ mile is therefore N. $0^{\circ} 17' W.$ and the length 40.50 chs. I now destroy this old $\frac{1}{4}$ sec. cor. as same is situated in the State of Nevada.

From the old $\frac{1}{4}$ sec. cor., I retrace North, on E. Bdy. of sec. 24.

40.20 Fall 13 lks. E. of the old cor. of secs. 13, 18, 19 and 24, which is a decayed stake firmly set in a mound of stone, with markings nearly obliterated. The true bearing of this $\frac{1}{2}$ mile is therefore N. $0^{\circ} 11' W.$ and the length 40.20 chs. I destroy all traces of this cor. as same is situated in the State of Nevada.

From the true point for cor. of secs., 13, 18, 19, and 24, I retrace North on the E. Bdy. of the Tp. making diligent search for old cors. at 40.00 and 80.00 chs. and at 240.54 chs. fall 63 lks. E. of the old cor. of Tps. 38 and 39 N., R. 17 E., which is a decayed stake lying on the ground, near a small mound of stone, evident remains of the old cor.

The return bearing from this Tp. cor. to the cor. of secs. 13, 18, 19 and 24, is therefore S. $0^{\circ} 09' E.$ and the proportional distance is therefore 80.18 chs. for each intervening mile.

Retracement of the N. Bdy. of sec. 1, T. 38 N., R. 17 E.

From the old cor. of Tps. 38 and 39 N., R. 17 E., here-
