

Retracement of Subdivisions T. 14 N., R. 26 E.

Chains

July 18, 1913;

At 8^h. 30^m. a. m., l. m. I set off 39° N. on -the lat. arc; 21° $4\frac{1}{2}'$ N. on -the decl. arc; and determine a meridian with -the solar at the cor. of secs. 2, 3, 34 and 35, heretofore described, on -the S. body of the Tp.

Thence I retrace

N. bet. secs. 34 and 35

40.00

The point for the $\frac{1}{4}$ cor. of secs. 34 and 35, described in -the field notes of the Surveyor General as pits and mound of earth. After diligent search I find no traces of -this cor. Therefore I continue my retracement north.

80.00

Set a temp. point for the cor. of secs. 26, 27, 34 and 35. After diligent search no traces of the old cor., described by -the Surveyor General as post in mound, are found.

From the temp. point for the cor. of secs. 26, 27, 34 and 35, I retrace E. $\frac{1}{2}$ mile bet. secs. 26 and 35, but can find no traces of -the old $\frac{1}{4}$ cor. of secs. 26 and 35; therefore I return to the temp. point for -the cor. of secs. 26, 27, 34 and 35, and continue my retracement north, making diligent search at intervals of 40.00 chs. for the old cor. along this line. The land along this line lies mostly in a flat, subject to overflows, which apparently have destroyed all traces of -the old cor., described in
