

Chains

Resurvey by A. T. Harris.

July 1, 1914. At 8h. Om. a. m., 1. m. t., I set off 40° 25' N. on the lat. arc and 23° 10' N. on the decl. arc, and determine a meridian with the solar, at the cor. of Tps. 29 and 30 N., Rs. 42 and 43 E.

Thence I retrace South on a random line bet. secs. 1 and 6.

40.10 Intersect the old 1/4 cor. of secs. 1 and 6, which is a volcanic rock, 4 X 8 X 12 ins., firmly set in a mound of stone and marked 1/4 on W. face.

80.10 Set temp. point as no trace of the old sec. cor. is found, after diligent search. I continue retracement south along same line and at 39.98 chs. dist. from the temp. point for the sec. cor., I intersect a point 30 lks. W. of the old 1/4 cor. of secs. 7 and 12, which is a willow post, 2 X 2 X 24 ins., marked 1/4, and lying along side of pits and mound of earth. I reestablish this cor. as follows:

No iron post available, I set a granite rock, 6 X 10 X 12 ins., 8 ins. in the ground, marked 1/4 on W. face, and raise a mound of stone, 2 ft. base, 1 1/2 ft. high, W. of cor.

Thence I run

N. 0° 13' W. on a true line bet. secs. 7 and 12. Over rolling land, draining SE.

.30 Dry wash, 40 lks. wide, course S. 15° E., asc. gradually.

19.60 Dry wash, 30 lks. wide, course S. 45° E.

39.99 Proportional distance. I reestablish this cor. for secs. 1 and 12, at T. 29 N., R. 42 E., as follows:

No iron post being available, I set a granite stone, 6 X 8 X 14 ins., 8 ins. in the ground, marked with 5 notches on S. face, and 1 notch on N. edges and dig pits, 24 X 24 X 12 ins. in each sec. 56 ft. dist., and raise a mound of earth, 4 ft. base, 2 ft. high, W. of cor.

Land rolling foot hills.

Soil gravelly and rocky loam, unfit for agriculture.
