General Description.

This township is very rough and mountainous, long ridges extend in a northerly and southerly direction throughout the township. In the south center part, secs. 27, 28, 33, and 34, the ridges are high and rough and of limestone formation; while the remaining part is of volcanic formation, excepting small portions in the northeast and northwest of the township where the formation is granite. The soil in most of the township is a light clay loam
