

Resurvey of subdivisions T. 29 N., R. 40 E.

Chains Aug. 14, 1914; At 9h 5m, a.m., l.m.t., I set off $40^{\circ} 22'$ N. on the latitude arc; $14^{\circ} 30'$ N. on the decl. arc; and determine a meridian with the solar at the old cor. of secs. 23, 24, 25, & 26, which is quartzite stone 8-10-20 ins. above ground firmly set, marked and witnessed as described by the surveyor general. I reestablish the cor. at the same point as follows:

Set an iron post 3 ft. long, 2 ins. diam., 24 ins. in the ground for the cor. of secs. 23, 24, 25 & 26 with brass cap mkd.;

S23	S24
S26	S25

1914 ;

and raise a mound of stone 2 ft. base, $1\frac{1}{2}$ ft. high, w. of cor.

Thence I retrace south bet. secs. 25 & 26,

40.02 The old $\frac{1}{4}$ cor. of secs. 25 & 26, which is a willow post 2-2 ins. and $2\frac{1}{2}$ ft. long, mkd. $\frac{1}{4}$ S, lying alongside mound of stone, bears E. 5 lks. dist. The course of this $\frac{1}{2}$ mile is therefore S. $00^{\circ} 4'$ E.

I continue my retracement south on same line.

80.00 Set temp. point for the cor. of secs. 25, 26, 35 and 36, after diligent search no traces of the old sec. cor. are found. I continue my retracement south from the temp. cor. and at 40.24 chains intersect E. and W. line, 6 lks. W. of the old $\frac{1}{4}$ cor. of secs. 35 and 36, which is a willow stake 2-2 ins., $2\frac{1}{2}$ ft. long, lying alongside traces of pits and mound of earth.

I return to the temp. point for the cor. of secs. 25, 26, 35 and 36, and correct it to a position, 13 lks. S. and $5\frac{1}{2}$ lks. E., which is the proportionate distance N. and S. for the reestablished sec. cor., at which point I build a cor. as follows:

Set an iron post 3 ft, long, 2 ins. diam., 24 ins. in the
