General Description of T.5 S., R.66 E.

This township is located about 10 miles southwest of Caliente, Nev., and includes what is known as Meadow Valley which is bordered on the east by the Mormon range, and on the west by the Meadow Valley range of mountains. Meadow Valley varies in width from about 10 to 22 chs.

Owing to the presence of steep and impassable porphyry and granite ledges, only a small portion of the Tp. was surveyed and in the part surveyed, it was necessary to survey various offset lines and to verify same by independent lines and measurements.

The general character of the land in T.5 S., R.66 E. is very rugged and mountainous, tho the greater part of the portion surveyed which includes Meadow Valley canyon, is rolling with a general drainage to the south.
