

## GENERAL DESCRIPTION.

Almost the whole of this fractional township lies on the Black Rock Desert, though the northeast and southwest corners and the west boundary are in rolling hills. The northern part of the west boundary is really rough enough to be classed as mountainous.

Near the  $\frac{1}{4}$  section corner between sections 25 and 30 is a low pass, through which passes the road connecting some of the Pacific Live Stock Co. ranches.

The soil of the rougher portions ranges from very rocky to gravelly and sandy. That of the desert portion is partly adobe and partly sandy. There is a fair growth of low sage and shadscale in the rougher parts and much greasewood, shadscale and rabbit brush on the desert. There is no timber.

Except for waste water from the Pacific Live Stock Co.'s "Clark's Field" and A. L. De Long's ranch, both in section 16, there is no water in the part of the township included in this survey.

The only improvements in the part of the township included in this survey consist of some fencing and the cultivation of some land in section 21.

Very respectfully,

Walter E. Hoffman

U.S. Surveyor.

C E R T I F I C A T E

I, H. W. Reppert, U. S. Surveyor, do certify on honor that, in pursuance with the instructions of the Commissioner of the General Land Office, I have well, faithfully, and truly, in my own proper person, examined the foregoing field notes, and compared the same with the abbreviated returns, prepared by W. E. Hoffman, U. S. Surveyor, deceased, from the record of the field tablets of his survey of T. 41 N., R. 28 E., M. D. B. and M., Nevada, and that the same are, to the best of my knowledge and belief, a true and correct record of the surveys which they represent, and that the corners of said surveys have been established in strict accordance with the Manual of Surveying Instructions of the Surveyor General for Nevada, and in the specific manner described in the field notes, and that the foregoing are the proper field notes of such survey.

April 11, 1917

U. S. Surveyor.
