At 12h 00m, noon, apparent time, I set off $22^{\circ} 19' N.$, on the decl. arc and observe the sun on the meridian for latitude. The resulting latitude is $39^{\circ} 31\frac{1}{2}' N.$. Continue S. on a retracement of the E. bdy. of the Tp. making careful search at intervals of 40 chs. for traces of old corners.

At 10h. 00m., a.m., apparent time, I set off $22^{\circ} 04' N.$, on the decl. arc; $39^{\circ} 29' N.$ on the lat. arc and determine a meridian with the solar at the cor. of Tps. 18 and 19 N., Rgs. 48 and 49 E. which is a wooden post, 3 ins. square, 3 ft. long, set in a mound of stone and properly marked.

Thence I run
