GENERAL DESCRIPTION.

This Tp. is located about half way between Tonopah and Ely, Nev., on the West edge of Railroad Valley and borders along the East side of the Pancake Range of mountains.

With the exception of the extreme NW. section of the Tp. and the three North miles on the W. bdy., the general character of the land is slightly rolling with a general drainage to the SE. and E.; the general character of the small portion not rolling is mountainous of quartzite, porphyry and lime stone formation with a general exposure and drainage to the SE.

The soil of the Tp., is found to vary; that of
