

Retracement and Resurvey of the
West Boundary of T.11 N., R.68 E.

Chains

instrument are satisfactory.

The magnetic bearing of the true meridian, at 7h 15m a.m., is N.17° 00'W.; the angle thus determined gives the mag. decl., 17° 00'E.

Note: The sky was overcast at noon of this date; therefore I was unable to observe the sun for latitude.

Note: A five chain steel tape and clinometer were used on all measurements of this work, the tape being frequently tested by comparison with a standard one chain steel tape kept for this purpose.

July 27, 1916.

From the cor. of secs. 1,6,7 and 12, on the W. bdy. of the Tp., which is identified only by very plain remains of old pits and mound of earth, there being no traces of the old wooden cor. stake, as described by the surveyor general, I retrace

North, bet. secs. 1 and 6.

40.00 Unable to find any traces of the old $\frac{1}{4}$ sec. cor.
Set temp. point.

80.00 Intersect the cor. of Tps. 11 and 12 N., Rs. 67 and 68 E., which is a willow post, 3 ins. square, 3 ft. long, lying on the ground, marked and witnessed as described by the surveyor general.

I return to the cor. of secs. 1,6,7 and 12, on the W. bdy. of the Tp., heretofore described, and retrace South, bet. secs. 7 and 12.

40.00 Find no traces of the old $\frac{1}{4}$ sec. cor.
Set temp. point.

80.00 After diligent search found no traces of the sec. cor.
Set temp. point for cor. of secs. 7,12,13 and 18.
