

## Dependant Resurvey of the N. Bdy. of T. 37 N., R. 18 E.

Chains.  
75.47 The re-established C. C. of Ts. 37 and 38 N., R. 18 E., heretofore described.

Land, broken mountainous, general exposure to N.

Soil, rocky heavy clay loam, shallow and covered with basalt boulders.

Medium to heavy growth of sage, deer browse and bunch grass.

Scattering juniper and scattering thickets of mahogany.

Note: The method of re-establishment of the South Boundary of T. 38 N., R. 18 E. is sufficiently set forth at the begining of the Dependant Resurvey of the North Boundary of T. 37 N., R. 18 E, as the same proportion was used through the resurvey, excepting the Fractional mile tying to the Nevada- California State Boundary, which was as follows:

$$311.10 : 71.10 :: 315.39 : 72.09,$$

throwing the deficiency on the last  $\frac{1}{2}$  mile.

The cors. refering to T. 37 N., R. 18 E., were set, using the following method to determine their position:

Running North on a true line, (sectional guide meridian) bet. secs. 3 and 4 to an intersection with the South Boundary of T. 38 N., R. 18 E., the cor. of secs. 3 and 4 was set, the  $\frac{1}{4}$  sec. cor. for sec. 3 was set with an easting of 40.00 chs. from this cor., and the  $\frac{1}{4}$  sec. cor. of sec. 4, the cor. of secs. 4 and 5, and the  $\frac{1}{4}$  sec. cor. of sec. 5, were set with a westing of 40.00 chs., 80.00 chs. and 120.00 chs. respectively from the cor of secs. 3 and 4.

The deficiency in the twp. being against the Nevada- California State Boundary in the W.  $\frac{1}{2}$  mile of sec. 5.
