## GENERAL DESCRIPTION.

This township is located in Spring Creek Valley, and the land of the NW. and of the SE. cors. of the township is generally rolling and low rolling hills, the soil of which is a deep gray sandy loam and water worn gravel.

The NW. cor. is a malapai formation.

The land of the southern, and central portion and of the NE. cor. of township is generally, gently rolling, and the soil is a deep brown loam and gray sandy loam and clay. The NE. cor. and the E. portion is a lime stone and clay formation.

The township is covered with a medium growth of low sage brush.

Scattering cedars are found through the central and NW. cor. of the township.

There are numerous springs and bogs along Spring Creek, and the soil and water are strong alkaline.

Gentile Georgetta and William McCurdy are the only settlers located on this Township.

There was no indication of mineral noted on this Tp.
