General Description

This township consists of low rolling hills, covered with a scattered growth of sage brush and bunch grass. There is quite an undergrowth of scrub juniper in the NE. portion. The land in the Eastern portion is a light volcanic ash, while that in the Western is mostly rocky lava outcrpps.

There are two settlers in the township, both being located in sec. 34, along Spring Creek, this being the only water in the township.

There are no indications of mineral in this township.
