

Retracement of a Portion of the N. bdy. of T. 42 N., R. 52 E.

Chains

Nevada, as follows:

80.00 Set a granite stone, 16x12x10 ins., 11 ins. in the ground for cor. of secs. 4, 5, 32 and 33, mkd. 2 notches on W. and 4 notches on E. edges and dug pits, 18x18x12 ins., in each sec., 5½ ft. dist., and raise a mound of earth, 2 ft. high, 4½ ft. base, alongside.

I find this corner to consist of a mound of stones firmly embedded in the soil. This corner has had local recognition as an original for many years and is identified as such by Richard Young of Tuscarora, Nevada.

Retracements N. and S. of this corner corroborates its position on the ground with identified original corners of the subdivisional survey in Ts. 42 and 43 N., R. 52 E. I determine the position of the cor. of Ts. 42 and 43 N., Rs. 51 and 52 E. on the E. and W. line by single proportion and move the temp. cor. 2.45 chs. east.

Retracement of a portion of the W. bdy. of T. 41 N., R. 52 E.

From the cor. of secs. 7, 12, 13 and 18, T. 41 N., Rs. 51 and 52 E., which is a basaltic rock, 24x14x6 ins., set in a mound of stone, mkd. 4 notches on the S. edge, and 2 notches on the N. edge.

North, on blank line, on the W. bdy. of Tp.

160.00 After diligent search, I was unable to find any trace of the old cor. of Ts. 41 and 42 N., Rs. 51 and 52 E. I set temp. cor.

Retracement of the East Boundary of T. 42 N., R. 51 E.

From the temp. cor. of Ts. 41 and 42 N., Rs. 51 and 52 E.,

North, along the E. bdy. of T. 42 N., R. 51 E., on random line searching for original corners, none of which were found. Set temp. points at 40 chain intervals.
