

## Retracement of the Fifth Standard Parallel North, through R. 24 E.

7

Chains

All trace of the mound of stone have disappeared.

The true course of this  $\frac{1}{2}$  mile is therefore N.  $89^{\circ} 51'$  W.,  
and its length 40.07 chs.

From the standard cor. of secs. 32 and 33, west, on S.  
bdy. sec. 32.

22.88 Fall, 22 lks. S. of the standard meander cor. for T. 26 N.,  
R. 24 E., which I find to be a conglomerated stone,  
4x8x16 ins., above the ground, firmly set, dimly mkd.  
SC on N., MC on W. faces, with other markings not read-  
able. All indications of the pit and mound of earth  
have disappeared.

The true course of this portion of the S. bdy. sec. 32  
is therefore N.  $89^{\circ} 27'$  W., and the length 22.88 chs.

Note:

Finding the Fifth Standard Parallel North through  
R. 24 E., out of limits in alinement and measurement in  
accordance with above recorded retracement, it was neces-  
sary to run a sectional correction line on which to base  
the subsequent Subdivisions.

Further I make a Dependent Resurvey of the Fifth  
Standard Parallel North through R. 24 E., setting new  
standard  $\frac{1}{4}$  and section corners at regular intervals of  
40.00 chs., westward from the standard cor. of T. 26 N.,  
Rs. 24 and 25 E., and marking all original standard cors.  
AP. cors.

Dependent Resurvey of the Fifth Standard Parallel North,  
through R. 24 E.

Alongside the original standard cor. of T. 26 N., Rs. 24  
and 25 E., heretofore described; set an iron post,  
3 ft. long, 3 ins. dia., 27 ins. in the ground, for  
standard cor. of T. 26 N., Rs. 24 and 25 E., with  
brass cap mkd.
