

Retracement of the East Boundary of T. 42 N., R. 28 E.

29

Chains

Note: *See also original map*

Owing to the fact that nearly all corners on the first meridional subdivision line have disappeared it was necessary to retrace the east boundary of the township in order to reestablish all missing corners on the first meridional line.

I commence at the cor. of Tps., 42 and 43 N., Rs. 28 and 29 E., which is a granite stone, 2x4x6 ins., firmly set in ground, surrounded by a mound of stone, mkd. with 6 grooves on N. S. E. and W. faces. Thence

South, on retracement, on E. bdy. of sec. 1.

40.00 After diligent search, failed to find any trace of the $\frac{1}{4}$ sec. cor. Set temp. point.

83.62 Fall 53 lks. E. of the cor. of secs. 1, 6, 7 and 12, which is a granite stone, 10x12x18 ins., firmly set in ground, surrounded by a mound of stone, mkd. with 1 groove on N., and 6 grooves on W. faces. No other markings visible. The true course of this mile is therefore N. $0^{\circ} 22'$ E., and the length 83.62 chs.

From the original cor. of secs. 1, 6, 7 and 12, South, on retracement on E. bdy. of sec. 12.

41.65 Fall 37 lks. E. of the original $\frac{1}{4}$ cor. of secs. 7 and 12, which is a baked volcanic stone, 29x24x24 ins., firmly set in a mound of stone, mkd. $\frac{1}{4}$ on W. face. The true course of this $\frac{1}{2}$ mile is therefore N. $0^{\circ} 31'$ E., and its length 41.65 chs.

From this original $\frac{1}{4}$ sec. cor. South, on retracement, on E. bdy. of sec. 12.

42.89 Fall 1.60 chs. E. of the original cor. of secs. 7, 12, 13 and 18, which is a granite stone, 4x16x20 ins., firmly set in a mound of stone, mkd. with 2 grooves on N. and 6 grooves on W. faces. No other markings visible. The true course of this $\frac{1}{2}$ mile is therefore N. $2^{\circ} 08'$ E., and its length 42.92 chs.
