

Chains

adjusted temp. point for cor. of secs. 11, 12, 13 and 14.

The true course of the W. bdy. of sec. 13 is therefore N.  $0^{\circ} 21'$  E., and its length 83.87 chs..

The true course bet. secs. 12 and 13 is therefore N.  $89^{\circ} 37'$  E., and its length 80.42 chs.

---

From the cor. of secs. 1, 6, 7 and 12, on E. bdy. of the Tp., heretofore described, retrace West, bet. secs. 1 and 12.

40.00 After diligent search failed to find any trace of the  $\frac{1}{4}$  sec. cor.

80.52 The record distance. Set temp. point.

82.30 Intersect N. and S. line at a point 89 lks. N. of the adjusted temp. point for cor. of secs. 1, 2, 11 and 12.

The true course of the W. bdy. of sec. 12 is therefore N.  $1^{\circ} 11'$  E., and its length 83.89 chs.

The true course bet. secs. 1 and 12 is therefore N.  $89^{\circ} 22'$  E., and its length 80.52 chs.

The true course bet. secs. 1 and 2 is therefore N.  $1^{\circ} 59'$  W., and its length for the S.  $\frac{1}{2}$  mile 41.96 chs. and its length for the N.  $\frac{1}{2}$  mile 42.61 chs.

---

Note:

Preliminary to extending the N. Bdy., it was found from the foregoing resurvey of the S. and W. bdys., the retracement of a portion of the N. bdy. and the retracement of the first meridional subdivision line, that a random line west from the cor. of secs. 1 and 2, on N. bdy. would intersect the E. bdy. of T. 43 N., R. 27 E. and would vary more than 14' from the cardinal to the cor. of Tps. 42 and 43 N., R. 27 E. Therefore I run W. on a true line to a closing against the E. bdy. T. 43 N., R. 27 E.
