S. Bdy.	East	478.24		478.24	
	Convergency			.59	
		480.28	480.90	478.24	477.96
		480.00		477.96	
	Error in latitude		.28		
	Error in departure			.28	

## General Description of T. 14 N., R. 50 E.

With the exception of the north central portion, which lies in the head of the Antelope Valley, this township is rolling and broken mountainous, ranging in elevation from 7000 to 10,000 ft. The main divide in the central part of the township separates the drainage south to Fish Spring Valley and north into what is locally known as Antelope Valley, but designated as Dry Valley on General Land Office maps.

The soil is generally a fine grained clay of medium texture containing much gravel and rock; shallow on the crests of spurs and ridges and on the higher slopes, with many outcroppings of granite and basalt.

The township is heavily timbered over almost the entire area. The timber has no commercial value except for use as fence posts and fuel. A scrub variety of
