## Survey of the subdivisions of fractional T. 45½ N., R. 24 E.

## Chains.

Land: rolling mountainous.  
 Soil: rocky and gravelly clay.  
 Undergrowth: sage. Fair growth of grass.  
 Scattering to medium growth of mountain mahogany along crest of ridge.

## General description of fractional T. 45½ N., R. 24 E.

The area embraced in the survey of this fractional township is almost wholly suited for grazing purposes. The table land in sections 35 and 36 is slightly rolling and very rocky, descending rather abruptly westward to Echo Canyon, which is generally broken through section 34 and gradually ascending to rolling mountainous land to the west of the canyon.

The soil is a rocky and gravelly clay usually shallow on the higher slopes. There are numerous small outcroppings of volcanic rock throughout the township.

There is a scattering to medium growth of sage over the entire area and usually a good growth of grass.

There is a scattering to medium growth of mountain mahogany along the ridge in sections 31 and 32.

The pond situated in section 36, embracing an area
