

Township 28 North, Range 57 East

Chains

The west three miles of the north boundary of the township were surveyed by L. G. B. McDowell, Deputy Surveyor, in 1904. Several original corners along this line were recovered by W. B. Rice, Forest Examiner, in 1919 and 1921, in connection with the execution of Homestead Entry Surveys, Nos. 228, 229 and 230.

The following field notes are those of a dependent resurvey of a portion of the north boundary, survey of the south boundary, and survey of a portion of the east boundary of T. 28 N., R. 57 E.

For a description of surveying instruments and equipment used, tests of instruments and explanation of methods of determining true meridian, etc., see field notes entitled "Retracement and Partial Dependent Resurvey of Portions of the East and West Boundaries of T. 27 N., R. 57 E.", executed concurrently under this same group.

The geographic position of the southeast corner of the township, determined by scaling from U.S.G.S. Topographic Quadrangle Sheet "Jiggs", 1934, is latitude $40^{\circ} 15' 29''$ N., and longitude $115^{\circ} 29' 21''$ W.
