

SUBDIVISION OF T. 26 N., R. 54 E.

315

Chains	
40.00	Set temp. $\frac{1}{4}$ sec. cor.
80.28	Intersect the N. bdy. of the Tp., 2 lks. W. of the cor. of secs. 5, 6, 31 and 32, Thence S. $0^{\circ} 14'$ E., on true line bet. secs. 5 and 6. Desc. 60 ft. over rolling land, on a S. slope, thru scattering undergrowth.
23.00	Road, bears N. 80° E. and S. 80° W.
40.28	Set an iron post, 3 ft. long, 1 in. diam., 30 ins. in the ground, with a quart of charcoal deposited at base, for the $\frac{1}{4}$ sec. cor., with brass cap mkd. $\begin{array}{c} \frac{1}{4} \\ \text{S6} \quad \quad \text{S5} \\ 1939 \end{array}$
45.00	Foot of descent, bears E. and W.; over nearly level land.
80.28	The cor. of secs. 5, 6, 7 and 8. Land, rolling and nearly level. Soil, alkaline clay; 3d rate. No timber; undergrowth, sagebrush. Grazing, fair.

Final Test of Solar Attachment

Upon the completion of the survey of T. 26 N., R. 54 E., June 29, 1939, the solar attachment of Buff & Buff light mountain solar transit No. 9210, was tested upon the meridian described on page 1 of these notes and found to be in satisfactory adjustment.

GENERAL DESCRIPTION

Township 26 N., Range 54 E., is situated northward, about 45 miles distant from Eureka, Nevada. It is entered from the Eureka-Elko highway.

The terrain varies from mountainous or rolling mountainous in the east three tiers of sections to the nearly level dry lake bed within the west three tiers of sections.

The soil is an alkaline, sandy clay, 3d rate, in all localities outside of the bed of the dry lake. The bed of the lake is thick adobe mud just under the surface and is untillable.

There is no commercial timber within the township; the undergrowth consists of a scattering growth of sagebrush, greasewood and rabbit-brush, with some shadscale and native grasses.

Grazing, from good to poor in quality. A Grazing Division windmill and well of alkaline water is found in section 15.

There are no settlers within the township.
